

# Good to Go Green Program

DECREASE YOUR STRESS AND INCREASE  
YOUR CONFIDENCE BY SELECTING THE  
OLS TEAM TODAY!

# Our Good to Go Green Program

The OLS *Good to Go Green Program* is aimed at providing sustainable options for managing excess corporate assets. Together, with our clients, we discuss how to handle the removal of each asset group; whether you want to donate, recycle, give away, sell, dispose, or convert waste to energy. The ultimate emphasis is to minimize or mitigate landfill contribution through 90-95% repurposing of assets.

## SERVICES INCLUDE:

- Repurposing or recycling surplus furniture, fixtures, and equipment.
- Donating products to non-profit or charitable organizations for their original intended purpose.
- Employing sound disposition procedures of scrap, salvage, green waste reduction, and waste-to-energy procedures.
- Decommissioning and restoring space to lease condition.

By utilizing a variety of disposition methods, we are able to achieve a seamless and efficient liquidation process that reduces the environmental impact and fulfills your requirements. Decrease your stress and increase your confidence by selecting the OLS team!

## LIQUIDATION

Whether it is to benefit the environment, maximize your return, or expedite removal, the Good to Go Green Program is aimed at understanding and achieving your ultimate asset liquidation goals, while always having sustainability at heart. The best way to attain financial, environmental and social outcomes, is for OLS to utilize all options of asset disposition, including:

- Re-selling products through on-site sales.
- Donation of reusable products to local charities of your choice or ours.
- Recycling and salvage appropriate materials.

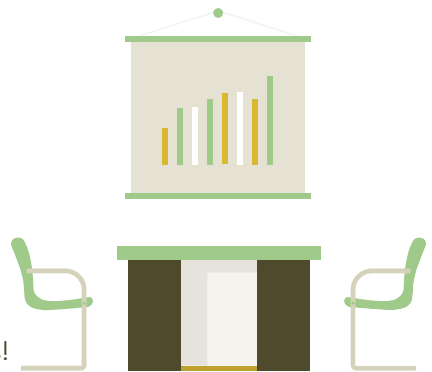

For those requiring a sustainable outcome, the *Good to Go Green Program* provides **zero-landfill** options as well.

## DECOMMISSIONING

Decommissioning assets and restoring a space to its end of lease condition includes a range of activities that must be well-planned and executed. At the core of the OLS decommissioning process is a team of experts who are skilled in communication and logistics. We can provide you with one or many of the following decommissioning services:

- Disassembly, removal and sale of: mechanical, electrical and plumbing systems, AV and IT equipment.
- Cable abatement.
- Wall patching and ceiling tile replacement.
- Trash disposal and broom sweeping.
- Lease review and advising.
- Facility walk-throughs with building management.

By engaging OLS and our *Good to Go Green Program*, you will ensure that when you vacate your space, you have achieved all of your lease-end obligations. We respect your time and strive to make your decommissioning or asset liquidation experience effortless!

By selecting the OLS team for your next project, you will not only achieve all of your goals in a seamless fashion, but also see why it is so **Good to Go Green!**
